U.S. DEPARTMENT OF HOMELAND SECURITY Federal Emergency Management Agency National Flood Insurance Program

OMB No. 1660-0008 Expiration Date: November 30, 2018

ELEVATION CERTIFICATE Important: Follow the instructions on pages 1–9.

Copy all pages of this Elevation Certificate and all attachments for (1) community official. (2) insurance agent/company, and (3) building owner,

SECTION A - PROPERTY INFORMATION	FOR INSURANCE COMPANY USE					
A1. Building Owner's Name	Policy Number:					
RICK KOEHNEMANN						
 A2. Building Street Address (including Apt., Unit, Suite, and/or Bldg. No.) or P.O. Route ar Box No. 6307 TURKEY COVE LANE 	Company NAIC Number:					
	ZIP Code					
PANAMA CITY BEACH Florida	32413					
A3. Property Description (Lot and Block Numbers, Tax Parcel Number, Legal Description, LOT 103 RIVERCAMPS ON CROOKED CREEK UNIT 2, TAX PARCEL NUMBER 32611-	· ·					
A4. Building Use (e.g., Residential, Non-Residential, Addition, Accessory, etc.) RESID	RESIDENTIAL					
A5. Latitude/Longitude: Lat. 30°17'42.4" N Long. 85°48'47.8" W Horizot	ntal Datum: NAD 1927 NAD 1983					
A6. Attach at least 2 photographs of the building if the Certificate is being used to obtain fl	lood insurance.					
A7. Building Diagram Number6						
A8. For a building with a crawlspace or enclosure(s):	:					
a) Square footage of crawlspace or enclosure(s) 1831.00 sq ft						
b) Number of permanent flood openings in the crawlspace or enclosure(s) within 1.0 f	oot above adjacent grade 5					
c) Total net area of flood openings in A8.b sq in						
d) Engineered flood openings? 🗵 Yes 🗌 No						
A9. For a building with an attached garage:						
a) Square footage of attached garage sq ft						
b) Number of permanent flood openings in the attached garage within 1.0 foot above	adjacent grade 0					
c) Total net area of flood openings in A9.b sq in						
d) Engineered flood openings?						
SECTION B - FLOOD INSURANCE RATE MAP (FIRM) I	NFORMATION					
B1. NFIP Community Name & Community Number B2. County Name	B3. State					
BAY COUNTY 120004 BAY	Florida					
B4. Map/Panel B5. Suffix B6. FIRM Index Date B7. FIRM Panel Effective/ Revised Date B8. Flood Zone(s)	B9. Base Flood Elevation(s) (Zone AO, use Base Flood Depth)					
12005C0190 H 06-02-2009 06-02-2009 AE	9.0'					
B10. Indicate the source of the Base Flood Elevation (BFE) data or base flood depth entered in Item B9:						
☐ FIS Profile ☒ FIRM ☐ Community Determined ☐ Other/Source:						
B11. Indicate elevation datum used for BFE in Item B9: NGVD 1929 X NAVD 1988 Other/Source:						
B12. Is the building located in a Coastal Barrier Resources System (CBRS) area or Otherwise Protected Area (OPA)? 🗌 Yes 🗵 No						
Designation Date: CBRS

Certification of Engineered Flood Openings

In accordance with the Code of Federal Regulations for the National Flood Insurance Program

I hereby certify that the Crawl Space Door Systems flood vents 816CS, 1220CS, 1232CS, 1616CS, 1624CS, 1632CS, 2032CS, 2424CS, and 2436CS are designed in accordance with the requirements of the Code of Federal Regulations for the National Flood Insurance Program (NFIP) to provide automatic equalization of hydrostatic flood forces by allowing for the entry and exit of floodwaters, when properly installed and sized as set forth below. Vent opening measurements were measured and certified by Mr. Christopher Mark Loney, Virginia P.E. NO. 029000. Detailed calculations were prepared as outlined In "Review of certification of Engineered Flood Openings," prepared by Dr. Georg Reichard, Associate Professor of Building Construction, Virginia Tech (available upon request from Crawl Space Door Systems, Inc. billy@crawlspacedoors.com)

Design Characteristics

Section 2.6.2.2 of ASCE/SEI 24-05 provides an equation to determine the required net area of engineered openings (A_o) for a given enclosed area (A_e). This equation is based on the hydraulic formula for the flow rate across sharp edged orifices. I have utilized this equation to calculate 1) the restricted flow rate through the main frame opening in case the louver is blown out during a flood event; 2) the flow rate through the individual openings between louver blades; and 3) the flow rate through projected openings between louver blades following hydraulic short-tube theory. The maximum total enclosed area (A_e) that can be serviced by a single vent has then been determined by utilizing the lowest flow rate of the three assessed scenarios for each vent and is listed in Table 1.

These values are based on the following assumptions:

In absence of reliable data, the rates of rise and fall have been

assumed at a minimum rate of 5 feet/hour;

 The (maximum) difference between the exterior and interior floodwater levels shall not exceed 1 foot during base flood conditions;

 A factor of safety of 5 has been assumed, which is consistent with design practices related to protection of life and property;

The net area of openings (A_o) as provided by the manufacturer.

Installation Requirements and Limitations

This certification will be voided if the following installation requirements and limitations are not enforced:

 There shall be a minimum of two openings on different sides of each enclosed area subject to flooding;

The bottom of all openings shall be no higher than one foot
 above the higher of the interior or exterior grade that is immediately under each opening;

Model [ft2] [in2 [in] 816CS 8 x 16 105 205 1220CS 12 x 20 235 500 12 x 32 1232CS 305 645 1616CS 16 x 16 180 395 1624CS 16 x 24 310 670 1632CS 16 x 32 405 835 2032CS 20 x 32 630 1240 2424CS 24 x 24 570 1230 2436CS 24 x 36 850 1765

Table 1 Maximum total <u>enclosed area</u> (A_e) that can be serviced by each individual model based on the given <u>net area</u> of engineered openings (A_c)

 No temporary (e.g. during cold weather) or permanent solid cover may be placed into or over the flood vent that would block the automatic entry or exit of floodwaters at any time;

Where data or analyses indicate more rapid rates of rise and fall, the required number of openings shall be increased to account
for those different conditions. The number or size of the openings may be decreased if data or analyses indicate rates of rise
and fall are less than 5 feet per hour.
